About Us

*Top-quality, Canadian-made
vacuum lifting technology*

At MQuip, we're on a mission to **manufacture, design, and transform** lifting solutions with **top-quality, Canadian-made vacuum lifting technology**. Our commitment is to set a global standard for excellence, empowering your industry with **innovative solutions that redefine what's possible**.

We go beyond delivering outstanding products – **our unmatched support and service ensures your success** through seamless operations. Join us in elevating your industry with cutting-edge, reliable vacuum lifting solutions. **We're not just lifting material; we're raising the bar for performance.**

THE MK2 IN ACTION

What are others saying about us?

“The Blizzard is
amazing!
**Best tool since my
first excavator!**”

Chris McCarthy,
One Landscape
Ontario, Canada

“This is hands down
the **best tool I’ve ever
bought**”

Rob Higgins,
Higgins Landscape Inc.
Ontario, Canada

“My MQuip vacuum has **increased
productivity**. It allows for more **precise and
complex installations**, and gives me peace
of mind knowing **we are all safe** while using
the MQUIP vacuum lifter.”

Derek Millhouse,
Forestscapes Landscaping
Wisconsin, USA

“I appreciate [MQuip’s] **customer service and
communications**. The equipment speaks for
itself but it is just that much better when you
know the **service is there to back it all up.**”

Alex,
Inca Stone
Pennsylvania, USA

“As quarry owners and manufacturers of natural stone products, we’re handling thousands of cubic meters of granite, marble, limestone and soapstone materials every day. We know how challenging it can be to safely and efficiently maneuver raw blocks onto saws, move cut stone through the production line, and palletize finished goods – all the way down to their final delivery and installation at jobsites.

MQuip has allowed us to **improve our efficiencies in all of these processes from beginning to end** thanks to their innovation in developing a wide range of products geared towards our industry. In particular, the MK2 lifter is a go-to product for our fleet of boom trucks setting solid granite steps. **We can accomplish more, in less time and with greater precision**, due to the addition of MQuip’s products. They offer us an end to end solution throughout all the steps of our stone work.”

Steven Schrenk,
Polycor
Quebec, Canada

Product Overview

M Line vs. B Line: Which is Right for You?

At MQuip, we offer **two main product lines** tailored to meet your specific lifting needs. Each line is engineered with unique strengths to maximize your productivity and efficiency based on the **type of material you work with** and your preferred operation style.

The **M Line** is designed for professionals handling **non-porous materials such as natural stone, guillotined armour stone, and wet-cast concrete**. Built with steel for durability, it is the ideal choice for heavy-duty tasks with lifting capacities up to 6,000 lbs.

The **B Line**, on the other hand, provides unparalleled versatility and supports **both porous and non-porous materials like dry-cast concrete, interlock, and patio pavers**. Constructed from lightweight aluminum, it offers easy handling and consistent, plug-in power for reliable, day-long operations.

The Blizzard
The core of the **B Line**

Use the comparison table on the next page to help decide which line best suits your project needs.

Comparison Chart

Feature	M Line	B Line
Material Suitability	Non-porous material only	Porous and non-porous material
Construction	Primarily steel for durability	Aluminum & steel blend for lightweight handling
Operation Type	Battery-powered for cordless convenience	Plug-in power for consistent, reliable use
Key Strength	High-capacity lifting for heavy-duty tasks	Versatility across all material
Lifting Capacity	Up to 6,000 lbs	Up to 970 lbs
Ideal Use	Natural stone and wet-cast concrete	Dry-cast pavers, interlock, patio pavers, and large format slabs
Customization	Interchangeable vacuum pads and attachments	Interchangeable vacuum pads and attachments
Models	Micro, MK2, Grizzly	Grip, Solo, Flurry, Hoist

How to Choose

1. Consider Your Material:

- If you're working exclusively with **non-porous material like natural stone, guillotined armour stone and wet-cast concrete**, the **M Line** is your go-to.

Important! The M Line is designed exclusively for non-porous materials and is not compatible with porous materials! For a mix, or exclusively porous material like dry-cast concrete, interlock, or other manufactured materials, the B Line offers unmatched flexibility.

2. Select Your Application:

- One-Person Operation: The **B Line** supports **one-person operations** for tasks requiring flexibility and ease of use.
- Two-Person or Machine-Assisted Use: Both lines support two-person or machine set-ups for precise, efficient work.

3. Customize Your Pad Size:

- Match the vacuum pad to the dimensions and weight of your material.
- Larger pads lift heavier loads** but remember: your pad should always be smaller than the material's surface to ensure a secure hold.

M Line

B Line

The **CLASSIC MINI**
and the **MK2**

The **BLIZZARD FLURRY**

FEATURES

Battery-Powered Freedom:

Cordless operation using 18v Lithium-Ion batteries for seamless mobility on job sites.

Steel Construction:

Built tough for lifting non-porous materials like natural stone and wet-cast concrete.

High-Capacity Options:

Models range from compact to heavy-duty, capable of lifting up to 6,000 lbs.

Customizable and Configurable:

Interchangeable vacuum pads and attachments ensure a tailored fit for every project.

The MK Line

MK2

Micro

Natural Stone | Wet-Cast Concrete
1,000 lbs Capacity

The Micro is your **entry-level vacuum lifter**, capable of handling up to **1,000 lbs** with ease. It's **compact, durable**, and ready for action, making it perfect for **smaller crews and tight job sites**.

Powered by the N18 battery system, the Micro includes two lithium-ion batteries and a charger, ensuring uninterrupted operation. For added control, an **optional two-person handleset** is available, increasing precision on awkward loads and tight-access jobs.

With a **fixed vacuum pad** designed for materials like **natural stone and wet-cast concrete**, the Micro is a **reliable, low-maintenance tool** that gets the job done every time.

Includes:

- 2 Lithium-Ion 5 Ah Batteries
- Battery Charger
- Seal Replacement Tool
- Accessory Carrying Case

Optional:

- 2-person Handleset
- Field Service Kit

MK2

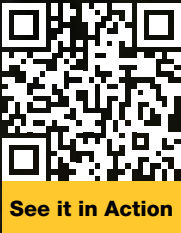

Natural Stone | Wet-Cast Concrete
3,000 lbs Capacity

The MK2 is your go-to vacuum lifter, handling up to **3,000 lbs** with ease. Designed for tough job sites, it's **compact, durable, and weatherproof**, so it keeps up with you all day long.

The **N18 battery system** (with two batteries included) means **no downtime**, and it's easy to swap out. Need versatility? The MK2 works with **seven interchangeable pads** for different surfaces, including a pad for rough terrain, giving you **precision and efficiency** on every lift.

- Includes:**
- 2 Lithium-Ion 5 Ah Batteries
 - Battery Charger
 - Quick-Connect Pad Pins
 - Seal Replacement Tool
 - Accessory Carrying Case

- Optional:**
- 2-person Handleset
 - Field Service Kit

FEATURES

Common Configurations

Every MQuip Vacuum Lifter is built to fit your needs. No two landscapers work the same, but we've designed our products to handle the most common challenges you face.

- For **Natural Stone Steps:**
- MK2 + 70/30 Vacuum Pad (~3'-8' step)
 - MK2 + 90/30 Vacuum Pad (~3'-10' step)

- For **Jumbo Flagstone:**
- MK2 + 90/45 Vacuum Pad (5' x 5' x 5" flagstone, ~1,800 lbs)
 - MK2 + 90/60 Vacuum Pad (7' x 7' x 4" flagstone, ~2,800 lbs)

Custom Vacuum Pads Available

MK2 Vacuum Pads

Regular Seal | Thick Seal (for textured material)

The **larger the vacuum pad, the larger the lifting capacity**. Your vacuum pad **cannot** be larger than the material you are lifting.

Product	Dimensions (cm)	Weight	Capacity
30/30	30cm x 30cm	20 lbs	412 lbs
40/40	40cm x 40cm	28 lbs	800 lbs
60/25	60cm x 25cm	30 lbs	660 lbs
70/30	70cm x 30cm	35 lbs	1,000 lbs
90/30	90cm x 30cm	45 lbs	1,400 lbs
90/45	90cm x 45cm	61 lbs	2,200 lbs
90/60	90cm x 60cm	75 lbs	3,000 lbs
75/35	75cm x 35cm	41 lbs	1,000 lbs

Grizzly

Natural Stone | Wet-Cast Concrete
6,000 lbs Capacity

The Grizzly is the **ultimate heavy-lifting solution**, capable of handling loads up to **6,000 lbs**. Perfect for **large-scale landscaping projects**, it's designed to tackle the toughest materials, including **natural stone, wet-cast concrete**, and even some types of guillotined armour stone.

Whether you're working with **oversized landings, massive stone steps**, or substantial armour stone, the Grizzly offers **unmatched power and durability**. Its rugged carbon steel construction ensures reliability on demanding job sites, while its N18 battery system (two batteries and charger included) delivers **cordless, all-day efficiency**.

Customizable with interchangeable vacuum pads, the Grizzly adapts to meet your unique needs. With its intuitive design and precision engineering, it allows you to save time, reduce labor costs, and improve safety on every lift. **Landscapers trust the Grizzly** to maximize efficiency and handle the **heaviest workloads effortlessly**.

- Includes:**
- 2 18v 12 Ah Lithium-Ion Batteries
 - Battery Charger
 - Quick-Connect Pad Pins
 - Seal Replacement Tool
 - Accessory Carrying Case

- Optional:**
- Field Service Kit

Common Configurations

Every MQuip Vacuum Lifter is built to fit your needs. No two landscapers work the same, but we've designed our products to handle the most common challenges you face.

- For **Natural Stone Steps**:
- Grizzly + 75/35 Vacuum Pad (~ 3'-8' step)
 - Grizzly + 95/35 Vacuum Pad (~ 4'-10' step)

- For **Oversized Landings**:
- Grizzly + 95/75 Vacuum Pad (8' x 8' x 4" slab, ~3,600 lbs)
 - Grizzly + 120/100 Vacuum Pad (10' x 10' x 4" slab, ~5,800 lbs)

- For **Some Armour Stone***:
- Grizzly + 75/53 Vacuum Pad (3' x 16" x 16", ~900 lbs)
 - Grizzly + 95/50 Vacuum Pad (4' x 20" x 20", ~1,900 lbs)

THE GRIZZLY HANDLING ARMOUR STONE

The **larger the vacuum pad, the larger the lifting capacity**. Your vacuum pad **cannot** be larger than the material you are lifting.

FEATURES

Plug-In Power Reliability:

Designed for consistent, long-lasting operation in diverse conditions.

Lightweight and Durable Aluminum Design:

Built for efficiency and reduced strain without compromising strength.

Versatility Across All Materials:

Capable of handling both porous (dry-cast concrete, textured stone) and non-porous surfaces, making it the ultimate flexible tool for landscapers.

Customizable and Configurable:

Interchangeable vacuum pads and attachments ensure a tailored fit for every project.

BUILT FOR
PAVERS

The **B**Line

The **Blizzard**

Suction: 4,000L/min

Capacity: 970 lbs

Works on:

Dry-cast concrete | Wet-cast concrete | Interlock | Natural Stone | Patio Pavers Large format slabs

Plugs into a household circuit

Looking for **MORE POWER?**

Ask about our **HIGH-OUTPUT** option

The Blizzard is the heart of MQuip's high flow lifting solutions, acting **like the battery in a power tool. Interchangeable and versatile, it powers one-person, two-person, and machine-assisted setups**, adapting seamlessly to your needs. With plug-in reliability and customizable vacuum pads, the Blizzard ensures consistent, efficient lifting performance across various materials.

Flurry

Dry-Cast Concrete | Wet-Cast Concrete | Natural Stone | Patio Pavers | Interlock

up to 440 lbs Capacity

The **Flurry** is an **innovative, hybrid vacuum lifter** that bridges the gap between **smaller, one- and two-person lifters** and larger, **machine-operated systems**. Designed primarily for lifting **dry-cast concrete**, it is also effective for **wet-cast concrete and natural stone**, adding flexibility to your lifting operations. With a focus on **high-demand landscaping projects** where **efficiency and precision are paramount**, the Flurry's **lightweight aluminum construction** enhances maneuverability, making it easy for a **two-person team** to work effectively while reducing fatigue during long work sessions.

Engineered as an all-in-one system, the Flurry offers dependable lifting performance with interchangeable pads to handle various material sizes.
